

Thank you for using our service. We are pleased to present the information you and your contractor need for the technology you've selected. You may make as many revisions as you'd like [here](#) or at www.casaintegration.com.

Project Summary

No new home should be without some basics. For your convenience, we've included the following items automatically:

Carrier Demarcation Connectivity

This connects your home to the outside world for Internet, cable TV, satellite TV, antenna TV, satellite radio, and telephone services.

Network

Great WiFi? Of course - we suggest the right wiring and the right gear.

Structured Wiring

Even with great WiFi, you'll still want bedrooms, guest rooms and other similar spots in your home to have the right wiring for now and the future, for computers, TV's and phones.

And here, grouped by the rooms and areas of your new home, are your current technology choices:

Family Room

- Wall-Mounted 65" 4K/HDR LED TV
- Wall-Mounted Front Speaker Bar
- Surround Sound
- Wireless Subwoofer
- Cable TV, Streaming TV, and DVR
- Game/Disc/Aux Connection
- Music
- Lighting Control
- Motorized Shades

Kitchen

- Music
- Lighting Control
- Motorized Shades

Dining Room

- Music
- Lighting Control
- Motorized Shades

MBR

- Wall-Mounted 55" 4K/HDR LED TV
- Music
- Lighting Control
- Motorized Shades

**The Johnson Family
227 Dry Creek Road
August 2, 2017**

Project Summary, continued

Master Bathroom

- Music

Guest Room

- 55" 4K/HDR LED TV

Patio

- Music (Surface-Mounted; Black)

Garage

- Music
- Surveillance camera

Front Door

- Intelligent Doorbell
- Surveillance camera

Internet-integrated Thermostats

Thank you for using our service. You may make as many revisions as you'd like [here](#) or at www.casaintegration.com.

Budget Summary

Here is are the approximate equipment and labor costs for what you've selected.

Item/Room	Equipment	Labor	Total	% of Total
Rough-In/Pre-Wire/Trim-Out	\$ 2,290	\$ 1,250	\$ 3,540	18.3%
Carrier Demarcation Connectivity	\$ -	\$ -	\$ -	0.0%
Network	\$ 850	\$ 150	\$ 1,000	5.2%
Structured Wiring	\$ -	\$ -	\$ -	0.0%
Family Room	\$ 5,000	\$ 250	\$ 5,250	27.2%
Kitchen	\$ 1,000	\$ 50	\$ 1,050	5.4%
Dining Room	\$ 750	\$ 50	\$ 800	4.1%
MBR	\$ 2,000	\$ 250	\$ 2,250	11.7%
Master Bathroom	\$ 800	\$ 50	\$ 850	4.4%
Guest Room	\$ 700	\$ 100	\$ 800	4.1%
Patio	\$ 800	\$ 50	\$ 850	4.4%
Garage	\$ 1,250	\$ 150	\$ 1,400	7.3%
Front Door	\$ 500	\$ 150	\$ 650	3.4%
Internet-integrated Thermostats	\$ 560	\$ 300	\$ 860	4.5%
	\$16,500	\$2,800	\$19,300	100.0%

Full disclosure: this pricing should be considered indicative only, and is not exact, primarily because of the differences in labor costs across the country.

Thank you for using our service. You may make as many revisions as you'd like [here](#) or at www.casaintegration.com.

Rough-In, Pre-Wire and Trim-Out Guidelines

To The Homeowner: When you feel you've finalized things, we strongly encourage you to share this entire Build Package immediately with your General Contractor and/or your project's Electrician. This will give them all of the information that they need to run the correct wiring for everything you've selected.

To the General and/or Other Contractor Responsible: We have asked the client what technical capabilities they'd like in their home and what follows specifies what is necessary for what they've requested. You may wish to review the Scope of Work we've provided to the client for a general overview of what you're building towards.

Our system automatically includes the following items:

- **Carrier Demarcation Connectivity**
- **WiFi**
- **Structured Wiring for Phone, Data, and Coax**

These items are reflected in the Cabling Specification that follows, including what cable(s) should be used, to/from locations, a termination list, and electrical requirements.

Our system asks the client about the following items, if they'd like them for their home, and if so, in what rooms or areas:

- 1) TV**
- 2) Music**
- 3) Lighting Control**
- 4) Motorized Shades**
- 5) Connected HVAC**
- 6) Surveillance Cameras**
- 7) Connected Front Door Bell**

We suggest the placement of the structured outlet rough-in brackets, speaker rough-in brackets (if any), and TV box rough-in brackets (if any) we've specified be installed first, with exact locations confirmed by the Homeowner. You will also want to identify the cable, internet, and/or telephone company's demarcation point to the property. The location and exit for cabling to the roof should also be identified. When those items are complete, please proceed with the pre-wire as follows. Here are some general guidelines, many/all of which you may already be familiar.

- Low-voltage wiring (Cat6, RG6, and speaker wiring) should not be run parallel to high-voltage electrical lines with any less than 1 foot of space between the low- and high-voltage lines. Not doing this can create noise or other interference on the low-voltage lines.
- When low-voltage lines must cross high-voltage electrical lines, this should be done at a 90 degree angle only. Not doing this can create noise or other interference on the low-voltage lines.
- Care must be taken when pulling low-voltage wiring, especially Cat6. This cable consists of 8 23AWG conductors, which are fragile. Do not crimp, bend or twist during installation.
- We recommend a minimum of an 18" service loop be left at each cable's end during the pre-wire.
- The primary home-run location is the Network Panel, which should be located in an indoor utility area. Optionally, a second home-run location will be the Music Shelf. This is a location, ideally at the Network Panel, consisting of shelves onto which the client's music system components will be placed. If the client has requested music in the home, speaker wiring will be home-run to this location, and the location will also require 120 VAC power and a data network (Ethernet) outlet.
- **IMPORTANT: If the client has requested Lighting Control, Motorized Shades, and/or Connected HVAC, we have provided generic product items. You or the responsible party will need to select, obtain and install the appropriate products and parts, based upon the specifics of this project. Note that in all cases, we'll recommend battery-powered motorized shades - no additional or special power requirements required.**
- **IMPORTANT: These are general guidelines only. Follow all local and state regulations.**

Project Instructions and Best Practices

Listed chronologically by Project Phase, following are some general instructions and best practices. Please be sure to share this information with your General Contractor and others involved in your project.

Who Installs Everything?

We are confident that everything you've selected can be installed by those already on your project team, including the **General Contractor's Staff** and the **Electrical Subcontractor**. In some cases, you may need to add the assistance of a **Network and/or General Handyman**. The following sites will allow you to easily find the right Handyman if you need it:

www.houzz.com
www.homeadvisor.com
www.angieslist.com

Rough-In and Pre-Wire

As the name says, this phase - which occurs after framing is complete but before the walls and ceilings go in - involves two major steps:

- ✓ Rough-In: installing brackets and enclosures that show the locations of items like built-in speakers, TV's, and structured wiring outlets
- ✓ Pre-Wire: running the necessary cabling to those locations

Be sure that either you or your contractor order the items needed for this phase - these are shown on the Equipment List.

It is our suggestion that the **Electrical Subcontractor** on your project be responsible for the Rough-In and Pre-Wire activities - this is typical on most projects and your project's electrician should be happy to perform this work, if it is not already included.

Item: Network Panel

On the paid Build Package, we provide useful information for you and your contractor in this space.

Project Instructions and Best Practices

Rough-In and Pre-Wire

Item: Structured Wiring Outlet

On the paid Build Package, we provide useful information for you and your contractor in this space.

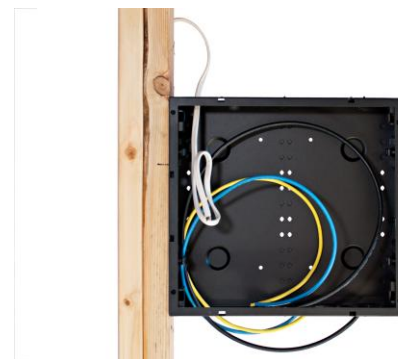

Item: Speaker Rough-In Brackets

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: TV Wall Box

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: Your Remaining Items Will Appear Here

On the paid Build Package, we provide useful information for you and your contractor in this space.

Trim-Out

This phase - which typically occurs before, during and after final interior painting, includes two major steps:

- ✓ Terminating all wires with jacks or plugs, and installing wall plates – this should be done by your **Electrical Subcontractor**. *Once terminated, each wire should be tested from end-to-end by the electrician.* The termination type is shown on the Pre-Wire Cabling Specification section of this document.
- ✓ Internet, telephone, TV, etc. services go live – this work will be done by your **Service Provider** (cable and/or satellite company, telephone company, etc.)

Be sure that either you or your contractor order the items needed for this phase – these are shown on the Equipment List.

Item: Network Panel

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: Structured Wiring Outlet

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: Your Remaining Items Will Appear Here

On the paid Build Package, we provide useful information for you and your contractor in this space.

Final Installation

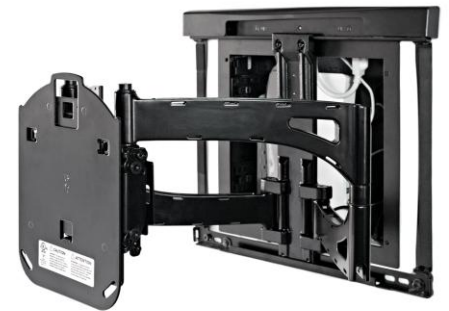

You're nearly done. This phase typically occurs two weeks before move-in, and includes:

- ✓ Activating your home data's network – this should be done by your **Electrical Subcontractor**, **Network Handyman**, or for the tech-savvy and so inclined, you can do it yourself.
- ✓ Installing speakers, TV's, cameras, etc. – this should be done by your **General Contractor's staff**, or by a **General Handyman**.

Be sure that either you or your contractor order the items needed for this phase – these are shown on the Equipment List.

Item: TV Mount

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: In-Ceiling Speaker

On the paid Build Package, we provide useful information for you and your contractor in this space.

Item: Your Remaining Items Will Appear Here

On the paid Build Package, we provide useful information for you and your contractor in this space.
